

# **BENCHMARKING & COMPLIANCE**

## **ACCURATE BENCHMARKING, COMPLIANCE REPORTING, AND PERFORMANCE ANALYTICS.**

Green Econome takes an accurate, efficient, and comprehensive approach to ENERGY STAR® benchmarking that ensures you receive meaningful data about the performance of your building for disclosure compliance, ESG reporting, green loans, auditing, or whatever your project needs may be. Our property use details and utility data collection, review, and verification process leads to complete benchmarking.

We apply deep expertise in national energy policy and building performance standards to ensure our clients are meeting or exceeding ongoing requirements through proactive communication. Green Econome provides insight into your property's energy and water consumption through custom Progress & Goals reports and our Building Performance Dashboard. We take time to review these with you and offer recommendations during our annual benchmarking consultation.

Let Green Econome handle your complete compliance, nationwide.

# BENCHMARKING & COMPLIANCE

## ELEVATED ENERGY STAR® BENCHMARKING AND COMPLIANCE SERVICES

Dedicated experts with an eye on complete compliance, delivering accurate and actionable data.

### ENERGY STAR BENCHMARKING

Accurate benchmarking and traceable whole building data establishes a baseline for reporting requirements.

### DISCLOSURE COMPLIANCE

Expert benchmarking reporting for energy policy, ESG, green loans, financing & incentive qualification.

### CUSTOM PROGRESS & GOALS REPORT

Custom summary report of benchmarking analytics, consumption data, and performance, for each building.

### PORTFOLIO REVIEW & CONSULTATION

Actionable insights and improvement recommendations annually, by a seasoned Green Econome professional.

### PERFORMANCE DASHBOARD

Building and portfolio level view of benchmarking data. Access reports, and easily identify savings opportunities.

### BENCHMARKING EVALUATIONS

Thorough review of the ENERGY STAR® Portfolio Manager® property for BPS pathways, or third-party verification.
